

Press Release

3rd July 2008

Eon Technologies and Tricerion announce a joint Partner Programme Agreement.

Eon Technologies and Tricerion announce a joint Partner Programme Agreement to extend their mutual capabilities in offering online business protection and service-oriented multi-channel solutions to the global banking and finance sectors.

Eon's BankFlex is an ultra modern multi-channel banking solution that empowers banks to rapidly maximise the value of their customer relationships across multiple channels in a uniquely stable, flexible, secure and low-cost environment.

Designed by specialist banking technologists, this cutting-edge multi-channel banking technology is available on Java and .NET platforms. BankFlex is highly configurable, flexible and scalable and is characterised by significantly low costs of implementation and ownership in a highly secure environment.

Tricerion's SafeLogin, is a patented zero-footprint authentication solution that replaces outdated, insecure logins, expensive token hardware and complex certificates. SafeLogin is fully integrated with BankFlex, Eon's ultra-modern, multi-channel solution. SafeLogin's unique approach based on picture passwords neutralises risks from phishing scams, keystroke logging spyware and registration robots, while enriching the user experience and reducing password resets.

Rakesh Jain, Director, Eon Technologies: "Following extensive research and due diligence, we are delighted to have found a flexible and robust security solution that further strengthened the high security capabilities of BankFlex. SafeLogin addresses the ever increasing risks and concerns over security for our clients. It is evident that many in the Banking and Finance sectors desperately need highly secure channel access and their issues are our priority."

Simon Maguire, Tricerion's Head of Sales EMEA, said: "We address our clients' pressing security issues in a way previously not possible and Eon completes the customer experience and transaction through their elegant and comprehensive BankFlex solutions. These are critical to delivering high quality and secure online services. We are pleased to have been chosen by Eon, and delighted to be working with them."
